## Condensation

When an induction cooktop is selected, condensation may occur.

Steam is vapourised water, and is generally invisible. At standard temperature and pressure, pure steam occupies about 1600 times the volume of an equal mass of liquid water. Steam most often refers to the white mist which forms above boiling water as the hot vapour mixes with the cooler environment. This mist consists of tiny droplets of liquid water and when it comes into contact with a cold or cooler environment, water droplets form on the surface. This water, known as condensation, then drips back on to the cooking surface.

With an induction cooktop, there is no residual heat on the cooking surface. The heat source is at the base of the pot or pan. When steam is present, vapour is formed and is clearly visible. When water is boiled on a gas burner, heat rises up on the sides of the pot or pan, which prevents vapour from forming, and heats the rangehood filters relatively quickly.

Only Qasair manufacture rangehoods designed to eliminate this issue of condensation over induction cooktops.

FLINDERS RANGE

# WESTMORE

designed for induction cooking

## Westmore

Westmore rangehoods are designed for use over induction cooktops, and for installation heights of **750mm-800mm**.

Westmore rangehoods come in the following sizes:

WES 60 L1 - 600mm W x 330mm D

WES 80 L2 - 800mm W x 330mm D

WES 90 L2 - 900mm W x 330mm D

WES 100 L2 - 1000mm W x 330mm D

WES 120 L2 - 1200mm W x 330mm D

Qasair recommend two motors wherever possible over induction cooktops, providing a maximum air movement of 1800 cubic metres of air per hour when operated on high speed.

Qasair Westmore rangehoods are fitted with LED lights and mesh air filters which can be cleaned in a dishwasher. It is important to use mesh filters over an induction cooktop, to prevent condensation from occurring.

Westmore rangehoods are fitted with Megasorber sound-absorbing panels, to further reduce the noise level.

At e & s we live and breathe kitchen, bathroom and laundry products.

For over 50 years, we have worked hard to bring you the most exciting and innovative products from Australia and around the world.

We love supporting Australian-owned companies, and we have a long history of working with Qasair Rangehoods to provide premium rangehoods, specifically designed for use in Australia.

We have worked with Qasair to create this exclusive range of hoods which will eliminate the condensation which can occur when an induction cooktop is selected.

Our hard working e&s staff understand the importance of buying the best products for your home and will help you make the most informed decisions when choosing your appliances.

When you step inside an e & s showroom, you'll not only marvel at our diverse range of products, but you will be able to test product functions, attend a cooking demonstration and even sit in a bathtub. It's all there for you to enjoy and explore and best of all, it's all under one roof.
