ATHERTON RANGEHOODS

Made in **Australia**

ALFRESCO LIVING

to suit your lifestyle!

Your outdoor kitchen is not just an extension, but a central part of your home. A thoughtfully designed outdoor area adds value, and additional space to cook and entertain in.

Our Atherton range is designed to work effortlessly in your alfresco area. Designed and manufactured in Australia, this range is built wider and deeper to provide adequate coverage over a barbecue. Our powerful internal motors extract the unwanted by-products of cooking through our solid metal ducting system, specifically designed for performance.

Efficient air extraction will significantly enhance air quality and prevent odours from lingering. Without a rangehood, smoke and grease particles settle on surfaces and over time, this can build up creating a greasy residue that is difficult to clean. A rangehood ensures proper extraction to direct these by-products of cooking easily out of your alfresco area. Your family and guests will be able to enjoy your outdoor space for longer.

We offer the perfect solution, with the only Australian made rangehood designed to effectively and quietly remove by-products of barbecue cooking. We are specialists in this area with over 50 years' experience in rangehood extraction for both indoor and outdoor use.

SOMERTON: PAGE 4-5

AVENEL: PAGE 6-7

SOMERTON

The Somerton rangehood is made using Type 304 Brushed, Non-magnetic Stainless Steel. This model is available in either 1200mm or 1500mm wide and are both fitted with three motors. Each model provides an air movement from 450 cubic metres per hour on low speed and up to 2700 cubic metres per hour on high speed.

Both models can be ordered as either top or back ducted and are fitted with LED strip lighting and mesh filters that are dishwasher safe.

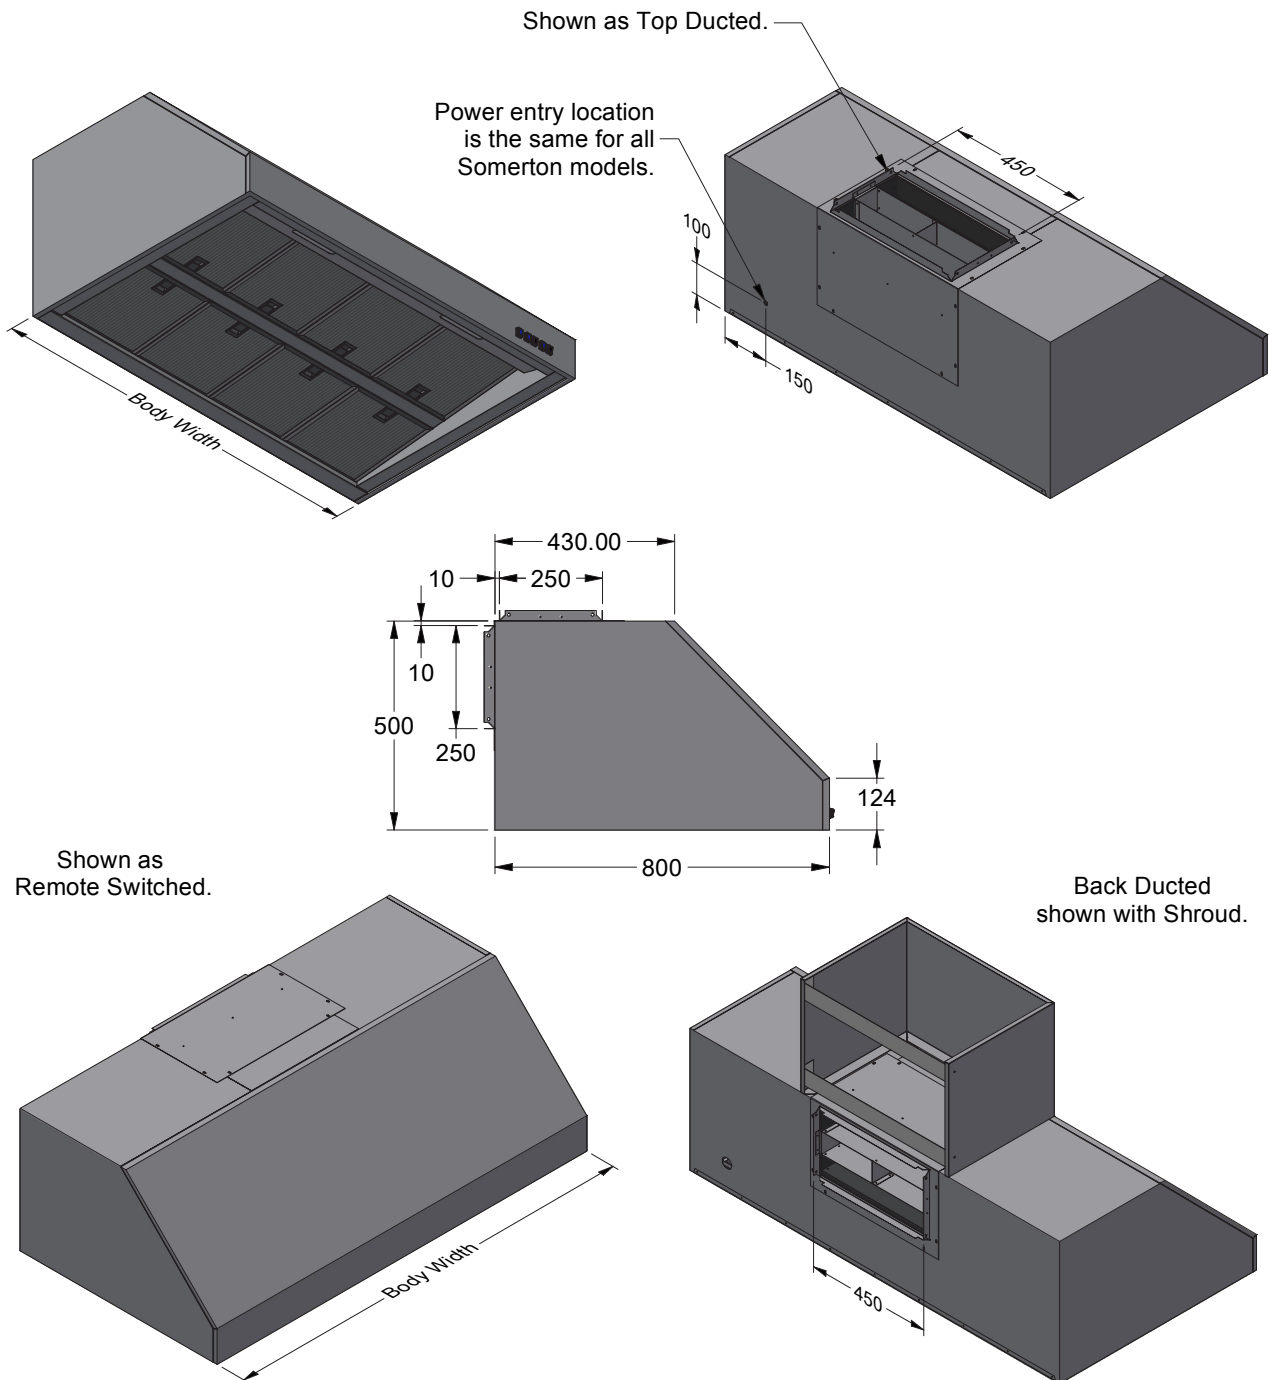

The Somerton is available in stainless steel only.

An optional shroud is also available in stainless steel only.

TECHNICAL SPECIFICATION SHEET

SOMERTON

WALL MOUNTED

Model	SOM 1200L-3 SOM 1200L-3 R	SOM 1500L-3 SOM 1500L-3 R	Model	SOM 1200L-3 SOM 1200L-3 R	SOM 1500L-3 SOM 1500L-3 R
Body Width	1200mm	1500mm	Filter Qty	8	6
Motor Qty	3	3	Filter Size	272mm x 290mm	459mm x 290mm
Light Qty	2	3	Conversion Top/Back Back/Top	YES	YES
Light Centres	545mm	460mm	Electrical Connection	Junction Box	Junction Box
ACWMLR				Version: E08/03/2024F	

Electrical connection is made at junction box inside rangehood.
 Somerton comes top ducted and can be converted to back ducting on site by the installer.
 "R" at the end of the model no. denotes remotely switched rangehood, switching is not supplied.

AVENEL

The Avenel rangehood is made using Type 304 Brushed, Non-magnetic Stainless Steel. This model is available in either 1200mm or 1500mm wide and are both fitted with three motors. Each model provides an air movement from 450 cubic metres per hour on low speed and up to 2700 cubic metres per hour on high speed.

Both models can be ordered as either top or back ducted and are fitted with LED strip lighting and mesh filters that are dishwasher safe.

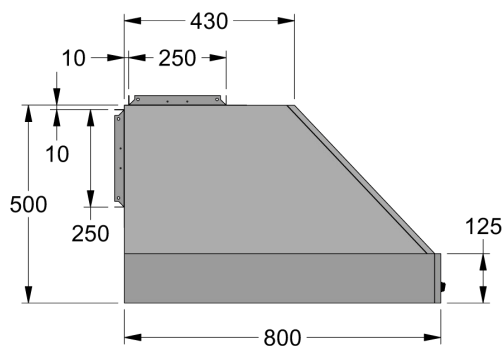

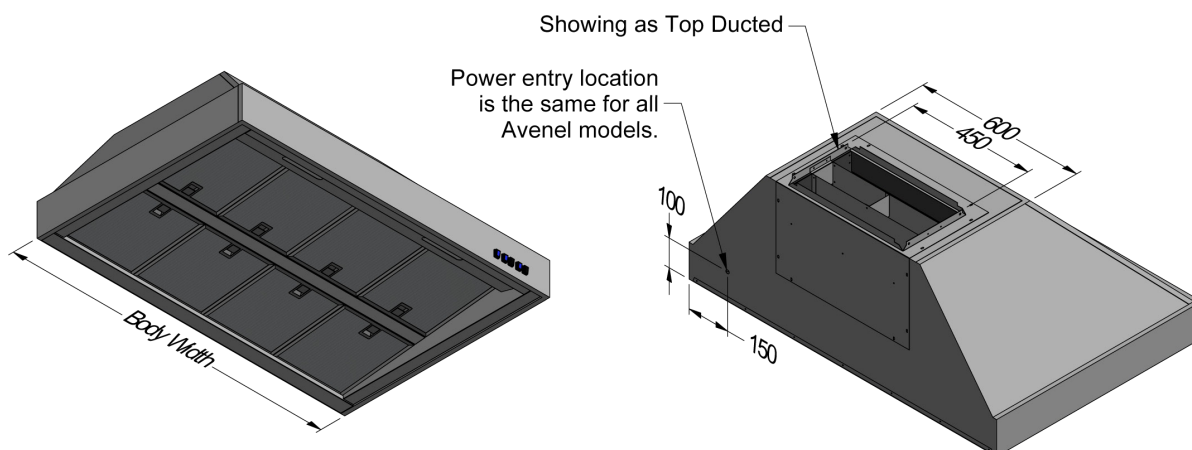

The Avenel is available in stainless steel only.

An optional shroud is also available in stainless steel only.

ATHERTON SHROUD

Somerton shown back ducted with shroud.

Avenel shown back ducted with shroud.

Model	ATH SHROUD
Min Height (H =)	75mm
Max Height (H =)	1400mm
Version: C 08/03/2024	

The Atherton shroud suits all Atherton rangehoods.
 This is a made to order item, a customer specification sheet is required.
 If height exceeds the maximum height, an additional cost will apply.

Diagram 1

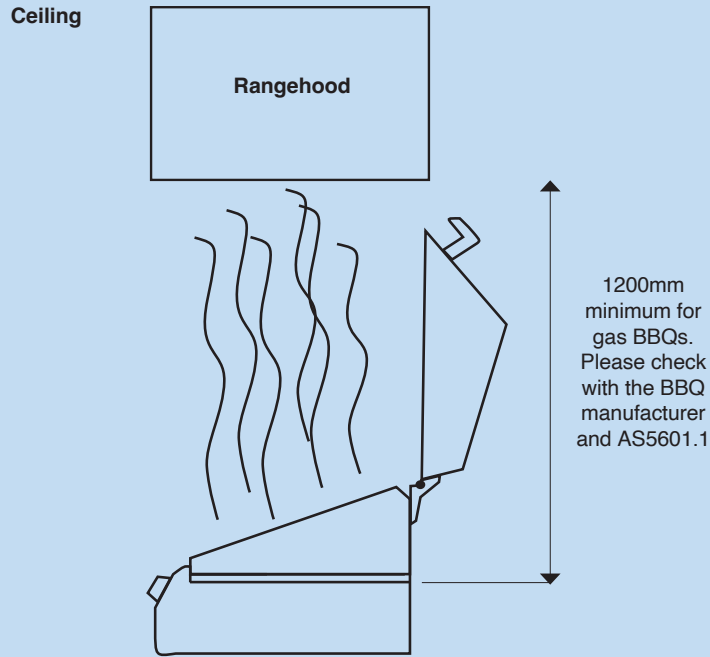

Diagram 1 - Shows a barbecue with the lid open at 90 degrees to the cooking surface and the smoke rises vertically unobstructed. The rangehood can be placed directly above the cooking surface. The diagram shows the relationship of the barbecue to the rangehood to optimise coverage.

Note: When the lid is closed smoke is vented during roasting, customers should consult with the BBQ supplier to determine where the smoke is vented. This area must be covered with a customised rangehood to suit the requirements.

Diagram 2

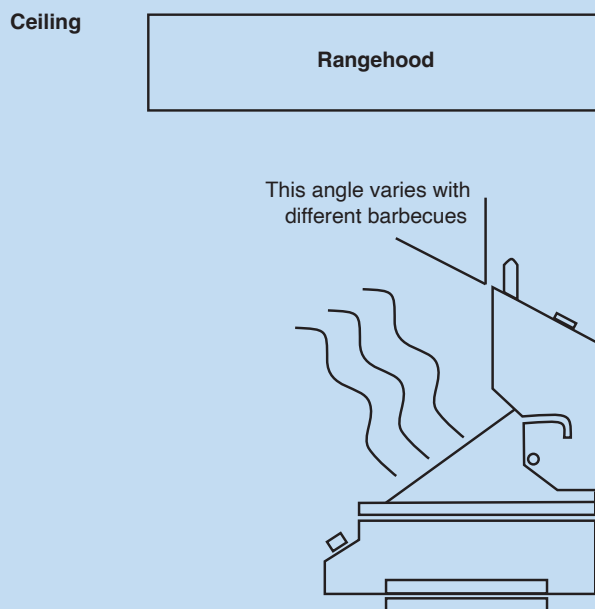

Diagram 2 - Shows an example of the barbecue lid in an open position that obstructs the cooking plume. The cooking plume is pushed outwards and back into the alfresco space. The rangehood size and position need to be able to capture the plume spread, which is typically achieved with a deeper rangehood in front of the barbecue so it will catch all the by-products of cooking.

Note: When the lid is closed smoke is vented during roasting, customers should consult with the BBQ supplier to determine where the smoke is vented. This area must be covered with a customised rangehood to suit the requirements.

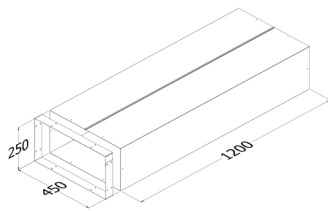

BARBECUE DUCTING

II = Inside to Inside Measurement.

SS = Stainless Steel (Ducting with the SS code is made in Type 316 Marine Grade Stainless Steel).

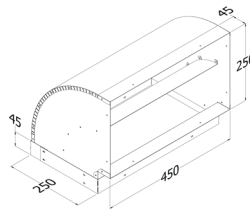

PC = Powder Coating.

Note: Some pieces will be supplied with a Zincalume duct joining strap to join the item together e.g. DL-1 with a DL-1. A joining strap will be shown on the drawing of the piece it is supplied with.

FILTERS

Our mesh filters are designed to capture all by-products of cooking. The filters are made up of 8 metal layers (outer layer mesh is stainless steel, internal mesh layers are aluminium). They are dishwasher safe using a neutral pH detergent. Please refer to our care instructions for further information.

LED LIGHTING

Our lighting utilises energy-efficient LED strip lights with an estimated lifespan of 60,000 hours. They are available in warm or cool lighting.

MOTORS

Our efficient all-metal motors are made exclusively for Condari Pty Ltd by leading manufacturer EBM Papst (Germany).

Single Motor 900m³/hr

Twin Motor 1800m³/hr

Triple Motor 2700m³/hr

SOLID METAL DUCTING

Our ducting is CAD-designed in-house and is optimised for efficient extraction. Our ducting is available in standard Zincalume, rigid all-metal construction which is non-flammable. We also offer ducting in stainless steel, ideal for coastal areas, and Powder Coated in custom finishes. Fire compliant ducting is also available for BAL areas of up to and including BAL 29.

**10 Year
Motor
Warranty**

WARRANTY

10 Year Warranty on motors.

3 Year Standard Warranty on all non-moving parts inside the rangehood.

6 Year Extended Warranty on all non-moving parts inside the rangehood when a recommended installer has installed the ducting/rangehood.
